Skills Summary

Experience

World Robot Game (WRG)
2021 (PERFORMANCE AWARDEE)

I have previously developed a robot utilizing artificial intelligence for a self-driving car, incorporating the 'Lane Keep Assist' technique commonly used in real vehicles.

Metaverse for smart Factory contest
2022 (Consolation prize worth 5,000 baht)

I simulated a factory environment designed to operate without any human intervention, aiming to address the challenges posed by the COVID-19 pandemic.

Year one Final Project in subject CPE101
2023 (The third runner-up)

For my final project, I developed a Discord bot for money management, using a web scraping tool to get total balances from mobile banking and store in MongoDB.

Internship at Pro consult Plus company
2022

I interned at Pro Consult Plus as a rookie backend developer, where I worked on a mini project using PostgreSQL.

COMCAMP 35 Technical & Academic for Web development
2024

"I'm part of the web developer team that created the COMCAMP 35 webpage. Additionally, I teach HTML and Tailwind to participants at the camp."

Education

King Mongkut's University of Technology Thonburi (Studying)

Bachelor of Computer Engineering (International),
